***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flachs U.S. Patent 4,860,404.

Flachs teaches a portable device for hoisting and skinning including a two spaced apart bases, upright members arranged to extend from each base, A cross beam 16 adapted to bridge the upper ends of the upright members to form a rigid frame, a winch 34 mounted on an upright member and equipped with a barrel and a handle for rotating said barrel. A first pulley block and second pulley block 20 attached to and depending from the cross beam. Regarding claims 1, 5 and 11, Flachs does not teach a side by side pulley. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the pulley of Flachs to have a side by side pulley, in order to secure multiple cable lines to the same pulley and respective mount.

***Conclusion***

Summary: Claims 1-11 are rejected.
